TECH STACK

- TypeScript & JavaScript (ES2023+)
- React 19 & Next.js 16 (App Router)
- Node.js & Express, REST APIs
- Firebase Auth & Firestore
- Payment webhooks (Mercado Pago)
- Vitest, ESLint, TypeScript strict
- Git, GitHub Actions, Vercel CI/CD
- Tailwind CSS
- Python · Java/Spring Boot · MySQL (training)

AI-NATIVE WORKFLOW

- Claude Code & OpenAI Codex (daily)
- Cursor & GitHub Copilot
- Multi-agent loops (Claude Code + Codex)
- Test-gated AI development
- Claude / OpenAI / Gemini APIs

LANGUAGES

- English: Advanced (C1)
- Spanish: Native

Andrés Listorti

AI-Native Builder · Agentic Development

Claude Code · Codex · multi-agent loops · Next.js | Remote

>> ABOUT ME

AI-native builder: I build every project with coding agents. Coding agents (Claude Code, Codex) write most of the code; I direct them and own the result, from scoping and architecture to review, testing and a live deployment. I even built Harness, an open-source loop where one AI model implements and another verifies, with tests as the referee. My work covers Next.js/React frontends, Node.js APIs, Firebase auth and data, signed payment webhooks, automated tests and CI on Vercel. As a practicing business lawyer since 2010, I also bring careful reading, privacy and security awareness, and clear communication with non-technical people.

>> WORK EXPERIENCE

Software Builder (freelance) · AI-native since 2023

Independent | 2020 - Present

- **Harness** (open source, github.com/andresListorti/harness): two-agent loop where Claude Code plans and Codex implements, and tests decide when a task is done. A to-do API built through it: 10/10 tasks, 109 passing tests, 0 human escalations. TypeScript, Vitest, GitHub Actions
- **Encaralo** (encaralo.com.ar, live): legal-tech app for Argentina. Severance calculator under Law 27.802, 31 document templates exported to Word, 19 guides, Mercado Pago payments with signature-verified webhooks, admin panel. Next.js 16, Firebase, Vitest; full purchase-and-refund flow tested in production
- **Digital Assistant:** AI SaaS (ES/EN/PT) that drafts Instagram posts and images with LLM APIs, schedules them and handles the inbox, always with human approval; Meta App Review approved
- **VIBA Agency:** full redesign of a marketing agency site (Next.js 16, Tailwind v4, GSAP): 11 service pages, brand-diagnostic lead funnel to WhatsApp, validated contact API, SEO and security headers
- **Zapatería Genaro:** online store with stock reservation and Mercado Pago checkout (test mode, launching soon); plus a pricing tool for a shoe factory

Independent Business Lawyer

Self-employed | 2010 - Present

- Business, commercial and civil law: contracts, compliance and data protection (Ley 25.326 / GDPR) for companies, including banking clients
