- Data Protection (Ley 25.326 / GDPR)

>> ABOUT ME

AI-native builder who turns business ideas into working websites, apps and automations in days or weeks, not months. I work with the latest AI tools every day (Claude Code, AI agents, Nano Banana): AI does most of the building, and I own the result, from scoping and product decisions to testing and a live launch. I build for businesses in any niche, and I'm upfront about my AI-first workflow from day one. As a practicing business lawyer since 2010, I also bring what most builders can't: a clear understanding of contracts, privacy and terms of service.

>> WORK EXPERIENCE

AI-Native Web & App Builder (freelance)

Independent | 2020 - Present

- Zapatería Genaro: full online store with catalog, stock reservation and Mercado Pago payments, running in production
- Digital Assistant: AI SaaS that drafts Instagram posts and images, schedules them and handles the inbox, always with human approval
- Costs & Pricing App: custom tool that calculates product costs and prices for a shoe factory
- Websites, landing pages and portfolio sites built and deployed with AI agents on Vercel
- AI visuals for products and social media with Nano Banana and Higgsfield

Independent Business Lawyer

Self-employed | 2010 - Present

- Business, commercial and civil law: contracts, compliance and advice for companies, including banking clients
- Careful reading, risk analysis and clear communication with non-technical clients
