AI TOOLS & WORKFLOWS

- Claude Code
- GitHub Copilot
- OpenAI Codex
- Cursor IDE
- AI Coding Agents
- LLM Integrations
- Agentic Dev Workflows

TECHNICAL SKILLS

JavaScript | Python | Java
React | Node.js | Express.js
Spring Boot | MySQL | JPA
HTML | CSS | Bootstrap
Git | GitHub | Jira | Postman
Figma | Scrum | Agile

LANGUAGES

- English - Advanced (C1)
- Spanish - Native

LEGAL EXPERTISE

- Business Law
- Commercial Law
- Civil Law
- AI Governance & Compliance

Andres Listorti

AI-Native Software Engineer

Full-Stack Developer | Buenos Aires, Argentina | Remote

>> ABOUT ME

Self-driven engineer who builds with AI tools daily - from Claude Code and Codex to custom agentic workflows. I combine solid full-stack experience (JavaScript, React, Node.js, Python, Java/Spring) with hands-on AI-native practices: directing coding agents, evaluating LLM output critically, and shipping faster than traditional development allows. My background as a licensed Business Lawyer is a genuine differentiator for governed AI: I understand contracts, compliance and the accountability layer that trustworthy enterprise AI requires. I learn by building, ship constantly, and thrive in high-ownership, fast-moving teams where output matters more than titles.

>> WORK EXPERIENCE

Freelance Software Developer

Independent | 2022 - Present

- Build full-stack apps integrating AI coding agents (Claude Code, Copilot) to accelerate development
- Rapidly prototype and iterate - turning ideas into working demos, then polishing to production quality
- Transform Figma designs into dynamic, responsive React applications with Node.js/Express.js backends
- Develop REST APIs, MySQL/JPA data layers, and integrate with distributed engineering teams
- Maintain Java/Spring Boot backend services and contribute across the full stack

Independent Legal Advisor

Self-Employed Law Firm | 2010 - Present

- Business, Commercial, and Civil Law - advising on contracts, compliance, and governance frameworks
- Regulatory accountability and enterprise trust expertise: maps directly to AI governance contexts
- Structured analytical thinking applied to complex, high-stakes problems under time pressure

>> EDUCATION

Full Stack Certification

Coder House | 2023-2024

Node.js, JavaScript, React, Java, Spring Boot, Git, Scrum, Postman, Jira

Algorithms in Python

ITMaster Academy | 2022-2023

JavaScript Algorithms & Data Structures | Responsive Web Design

FreeCodeCamp | 2021-2022

Lawyer - Business Law

Universidad de Belgrano | 2004-2009
